

## Leaf Canister

Like all Hayward® products the W530 Large Capacity Leaf Canister is extremely strong.

It's made from super tough Lexan® which not only makes it unusually durable, but it also gives the canister a longer life making it excellent value for money. While inferior units crack and breakdown through exposure to the elements and the pool water chemicals, the W530 will go on providing years of valuable service.

## Hayward's super tough, light-weight, large capacity leaf and debris canister.

Despite its amazing strength, the W530 Leaf Canister is surprisingly light weight. When connected into the cleaner hose line, it is very easy to carry and manoeuvre. Ruggedly built, Hayward® leaf/debris canisters are designed with the pool professional in mind.

### Features and benefits:

- **Extra large nylon bag**

To collect large leaves and debris before they reach the pool's main filtration system

- **Innovative flow design**

Ensures the water will always bypass the collected debris and maintain appropriate water flow through the pool pump

- **See-through**

Lexan® see-through construction lets you see what debris has been collected and when the bag needs to be emptied

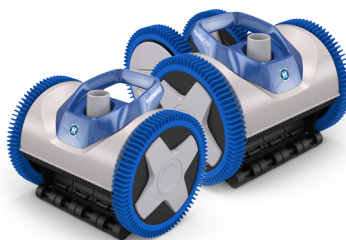

- **Quick access**

Easy opening lid provides quick access to the debris bag

*Suitable for:*

Navigator Pro

AquaNaut 250 & 450

Navigator V-Flex
